## DicomCDplus CD/DVD Burner

### *A Professional. High-Performance* **Dicom CD/DVD Burner Solution**

**DicomCDplus** is a Low cost solution to create DICOM CD's from any PACS, Modality or DICOM device. DicomCDplus work as a DICOM network device that can receive, query, or send DICOM modality studies. Upon receiving a study, from a multitude of sources (other DICOM CDs, Magneto Optical Discs, Modalities, PACS), it creates a standard DICOM 3.0 Part 10 CD or DVD. Our DicomCDplus solutions conform to the IHE Portable Data for Imaging (PDI) profile requirements which provide interoperability amongst facilities.

DicomCDplus is intended as a means for delivering medical images to patients and physicians in exchange for the traditional hardcopy exam films. The solution can also help to transfer medical images from non-connected PACS devices or DICOM workstations. DicomCDplus acts as a virtual printer on your DICOM network, which receives requests from UNLIMITED devices on your network and will create a CD with custom labels and printed patient information.

#### Key Features:

- » Low cost alternative to duplicating films
- » Intuitive User interface turns novices into experts in minutes
- » Receives and stores DICOM images onto a custom labeled CD/DVD coming from a DICOM-network. Touch Screen Ready
- » Windows 8 compatible
- » Drag&Drop Dicom files
- » AES 256bit Encryption
- » Dicom Query/Retrieve.
- » Burn studies from your web browser
- » Burn studies automatically as soon as it is received
- » On-demand disc creation and labeling directly from modality workstations.
- » Physicians have access to multiple studies on one single CD/DVD

**Primera offers complete support of Blu-ray Disc technology** across its entire product line. Blu-ray has become the worldwide standard for high-definition video offering more than five times the storage capacity of traditional DVDs. All of our Blu-ray disc publishers also incorporate a high-speed eSATA interface.

High-resolution Blu-ray Discs have become popular among videographers for distributing high-resolution videos of weddings, events and independent films.
